

Master of Arts »Science - Technology - Society«

Apply
for the academic year
2016/2017

Deadline:
April 30th 2016

Living in contemporary worlds means living with science and technology on a daily basis, both as professionals but also as citizens.

Do you want to ...

- => gain the expertise to recognize the social and ethical dimensions of science and technology?
- => enhance your ability to approach complex problems both systematically and imaginatively?
- => acquire the sensitivity to engage with the multi-dimensionality of current technological challenges?
- => develop your capacity to position yourself in the face of necessarily complex and incomplete information?
- => learn how to communicate issues related to science, technology and society?

The MA in Science – Technology – Society provides a comprehensive and critical approach to analysing

- (1) how (techno)sciences and society communicate and interact;
- (2) the cultures and contexts in which knowledge and innovations are produced and used;
- (3) how politics frames and is framed by science and technology.

Science – Technology – Society is a two-year English language MA programme. The number of students is limited to 30 per year. We offer a highly research oriented, interdisciplinary and international learning environment.
